Professional Summary

Digital product designer (web and apps) with 5 years of experience across consulting, the public sector and freelance work. I work from discovery and user research through prototyping, design systems and usability testing. I incorporate generative AI into my workflow and collaborate with cross-functional teams.

Key Skills

Product Design: Product Design, UX Design, UI Design, Design Systems, Low- and high-fidelity prototyping
Research: Discovery, User interviews, Usability testing, Benchmarking, Flow analysis
Process & Collaboration: Design Thinking, User-centered design, Cross-functional collaboration, Strategic product decisions

Professional Experience

UX/UI Designer - Product Designer | Freelance

2023 - Present

- Design digital products for a range of clients, from new builds to the evolution of existing platforms.
- Led redesigns of responsive corporate websites, improving visuals and experience with a focus on UI consistency.
- Lead redesign processes focused on improving UX and optimizing critical flows.
- Develop end-to-end solutions, from low-fidelity wireframes and problem definition to final high-fidelity design proposals.
- Work autonomously, adapting each project to business goals and client context.

UX/UI Designer | Luz Consulting

2025 - 2026

- Design digital products (web and apps) within the technology area, aligning business needs with user experience.
- Take part in early client conversations to gather requirements and define solution scope.
- Explore and develop multiple design proposals, from low-fidelity wireframes to high-fidelity prototypes, iterating until
- reaching a validated final solution.
- Collaborate with the development team on implementing custom skills and integrating Figma via MCP, streamlining the
- workflow between design and implementation.
- Work alongside cross-functional teams to ensure product implementation and evolution.

UX/UI Designer | Mooving Tech

2022 - 2024

- Conducted benchmarking and flow analysis, working with low-fidelity wireframes to identify opportunities to improve the user experience.
- Ran a usability test for a client in the industrial sector, identifying friction points and opportunities for improvement.
- Documented the work process and produced clear deliverables for development teams.
- Worked with Design Thinking processes alongside other disciplines to solve complex problems.

Professional Experience

UX/UI Designer | Ministry of Economy and Finance of Buenos Aires Province

2021 - 2023

- Analyzed and redesigned the experience of multiple modules of the RAFAM system (Municipal Financial Administration
- Reform), a province-wide platform built for the 135 municipalities of Buenos Aires Province.
- Gathered requirements from internal users, identified improvement opportunities, and proposed solutions with direct
- impact on daily operations.
- Defined and built the module's design system (UI Kit), from low-fidelity wireframes to implementation-ready high-fidelity prototypes.
